

```

procedure Bigsub is
  procedure A(Flag : Boolean) is
    procedure B is
      ...
      A(false);
    end; -- of B
  begin -- of A
    if flag
    then B;
    else C;
    ...
  end; -- of A
  procedure C is
    procedure D is
      ... ←----- 1
    end; -- of D
    ...
    D;
  end; -- of C
begin -- of Bigsub
  ...
  A(true);
  ...
end; -- of Bigsub

```

The calling sequence for this program for execution to reach D is

Bigsub calls A

A calls B

B calls A

A calls C

C calls D
